# Whale Alert

Apoqnmuin We'jianen Putupk

## What is Whale Alert?

- Whale Alert is an app that helps you easily identify whale species and report sightings.
- Whale Alert also provides contact information to report whales that are entangled, injured or dead to enable a response from trained whale rescue groups.

## How does Whale Alert help whales?

- Provides reporting numbers for whales in distress to enable a timely response.
- Provides information to notify shipping of the location of whales in the area.
- Provides information to scientists on whale numbers and location.
- Sightings of Right Whales are of particular interest.

To download the free **Whale Alert** app, scan the QR Code on this card or download the app online at [whalealert.org](http://whalealert.org).

**You can now report whale sightings.  
Your contribution is needed and appreciated!**
